

# THIS IS GENERAL ELECTRIC

# Textolite®

THE LONG-LIVED LAMINATED SURFACING

For walls, counters, work surfaces, door and drawer fronts—even for shower enclosures—Textolite provides a surfacing that's both easy to apply and long lasting. It offers superior resistance to stains, scuffs, and scratches—won't chip or crack—never needs refinishing. And it cleans with the swish of a cloth!

Choose from 67 Textolite patterns and colors. You'll find authentic marble patterns; rich woodgrains; distinctive decorator designs. And you'll get valuable information on how to apply General Electric Textolite to any surface that demands a combination of beauty, easy maintenance, and long life!

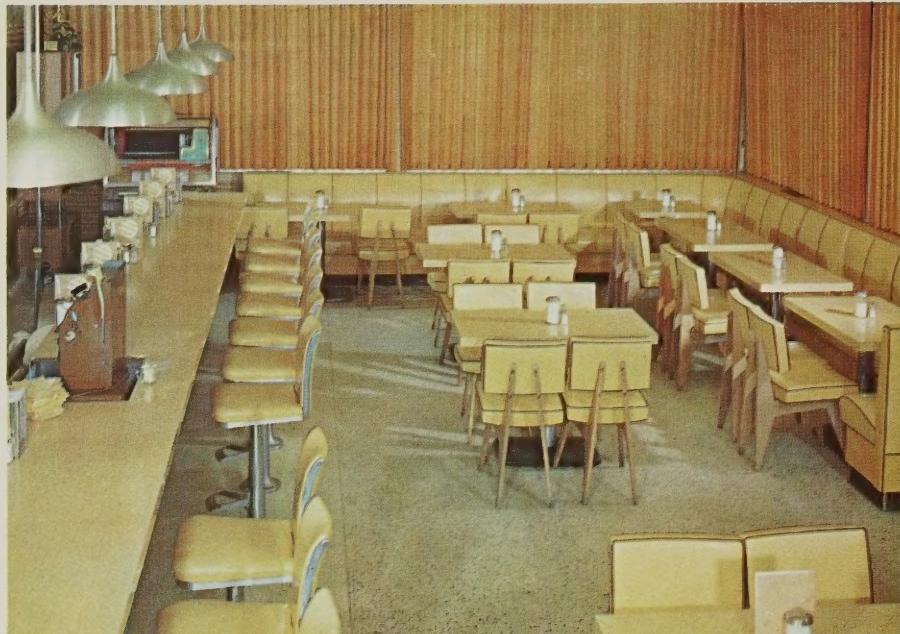

For home or commercial use . . .  
wherever you want beauty that lasts . . .

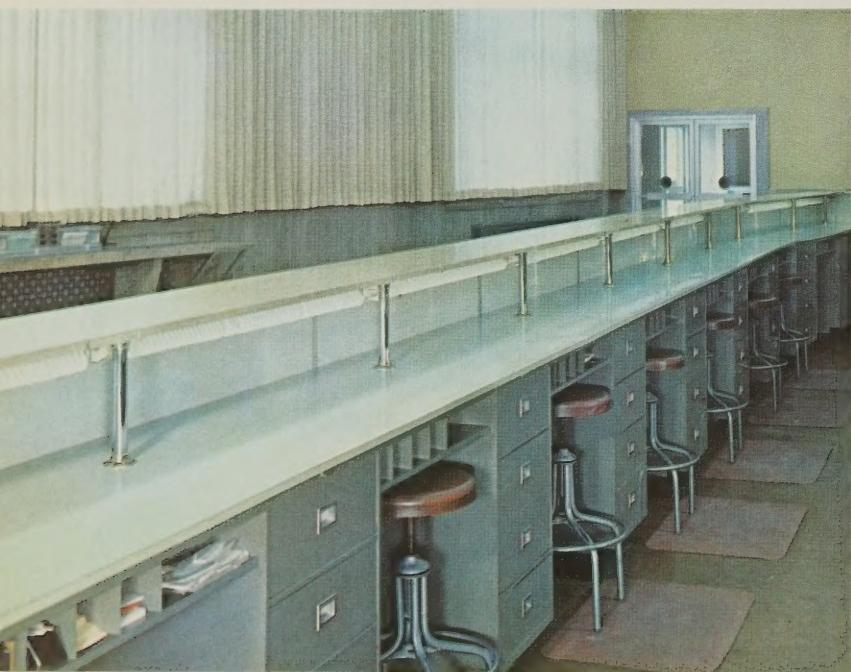

## Look to General Electric Textolite®

Steel kitchens built by United Metal Cabinet Corp. in new luxury Fisher Bros. apartment bldg. have Textolite surfacing bonded to cabinet doors and counters.

Fresh, bright eating places, like the Waymark Restaurant in Detroit, win new customers. Textolite Canary Ming on tables and counter-tops stays sparkling with a swish of a damp cloth. Textolite surfacing resists scratches . . . stays new looking for years.

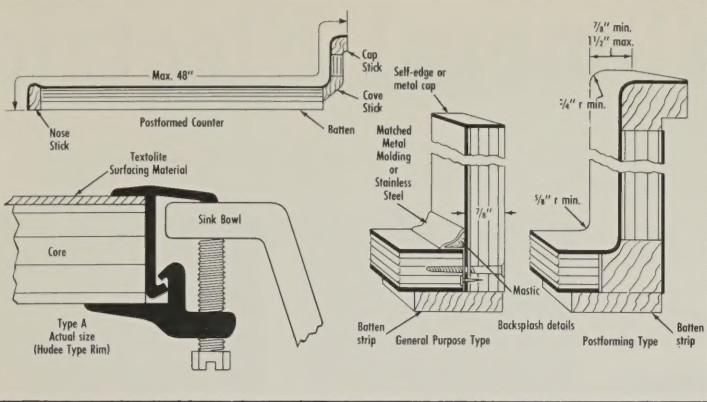

Cashier counters at the Coshocton, Ohio, National Bank are surfaced with Textolite Green Desk pattern. This design reduces eyestrain by more than 50%. Smooth Textolite surfacing is perfect for writing . . . and ink stains wipe off with a damp cloth.

### Textolite resists wear . . . stays new looking!

Use it on walls, doors, or ceilings. Apply it to flat surfaces like counters, desks, or work tables. Wrap it around columns or curves. Wherever you use Textolite, it stays new looking for years and years . . . and years!

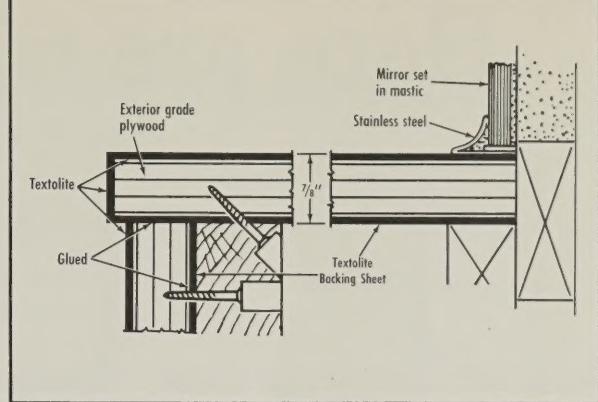

This is because of the way Textolite is made. Fine papers and plastics are combined under tons of pressure to create a surface that's almost impervious to stains. It resists scuffs and scratches . . . stands up under heat. For homes, institutions, and commercial buildings—for any place where appearance, easy upkeep, and long life are important—there's no real substitute for long lived General Electric Textolite!

## Postformed kitchen and bathroom counters

Postforming-type Textolite forms a handsome one-piece counter with backsplash and cap, easy-to-clean cove, and no-drip front edge. General Electric postformed Textolite counter tops are work-free and worry-free . . . no trapped dirt, no messy liquids in crevices.

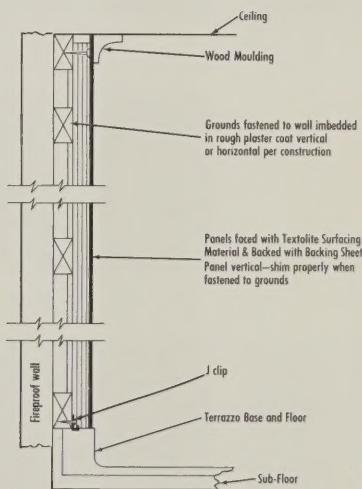

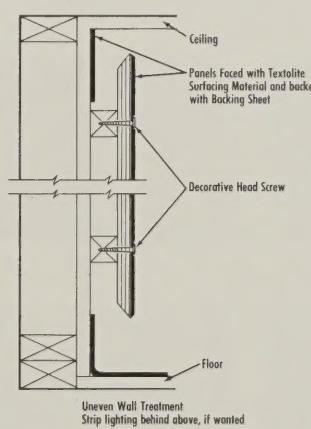

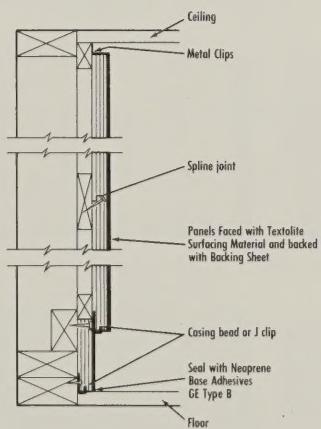

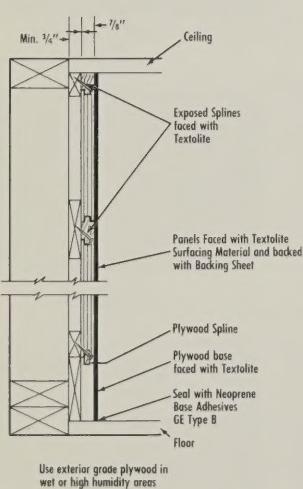

## Counter tops and tables

General Electric Textolite stays new looking with minimum upkeep. Wonderful surfacing for sinks, counters, work tables, vanities. Ideal in restaurants, bars, schools, hospitals, hotels . . . any area subject to daily wear.

The surfacing that goes up fast  
... and looks luxurious  
on any application

## WALLS

Attractive and durable, Textolite vertical surfacing stands up where ordinary wall surfacing fails. Daily wear, which mars other surfaces, does not affect Textolite. It's really rugged . . . scuffs, stains, and fingerprints wipe off in a jiffy.

General Electric Textolite vertical surfacing

is easy to install . . . on wall, wainscoting, or partition. Random-planked and squared effects can be simply produced. Beautiful patterns, including luxurious marbles and distinctive wood grains, make strikingly rich-looking surfaces. Ask for Specifications Folder T-CDL-424.

## WHY GENERAL ELECTRIC TEXTOLITE STAYS NEW LOOKING LONGER

Like all General Electric products, Textolite surfacing is continually subjected to exhaustive quality tests.\* These are some of the laboratory results that let you specify Textolite with confidence:

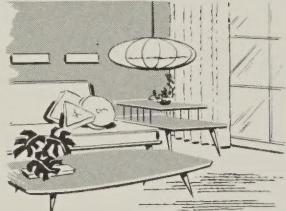

Resistance to cigarette heat . . .	144 seconds
Resistance to boiling water . . .	no effect
Resistance to hot grease . . .	no effect
Abrasive resistance . . .	476 cycles
Colorfastness to light . . .	no effect
Boil delamination—2 hours . . .	no effect
Stain tests . . .	no effect from alcohol, gasoline, acetone, carbon tetrachloride, fly spray, detergents, soap, olive oil, household ammonia, citric acid (10%), coffee, mustard, wax crayon, urea (6.6%), shoe polish, ink.

\*All tests according to National Electrical Manufacturers Association standards for high pressure laminates.

LAMINATED SURFACING  
**GENERAL ELECTRIC**

St. Gaspar Church, Rome City, Ind., uses Textolite Florient Marble on the communion rail and high altar. Pulpit and reredos are in Cherry and Maple woodgrain patterns. Textolite surfacing gives the richness of marble and fine woods . . . at far less cost!

## There's a General Electric Textolite<sup>®</sup> pattern—and color—for every interior

Whether you want authentic marble patterns, fine wood grains . . . or carefree designs . . . use Textolite laminated surfacing to give long-lasting beauty to your buildings.

Walls of the outer lobby in the modern Passaic County, N.J., Service Building are protected with attractive Textolite Frosted Walnut pattern. This Textolite surfacing gives the effect of luxury wood paneling, but lasts years longer . . . never needs refinishing.

Textolite surfacing on doors, like this Green Linen pattern in the Ann Arbor, Michigan, Public Library, makes corridors bright and cheerful. And Textolite surfacing resists the scuffs of lively children.

New Clackamas High School, Milwaukie, Oregon, built with maintenance in mind, has Textolite Woodland Ming wainscoting. Fingerprints, heel marks—even pencil marks—wipe clean with a damp cloth.
